

As the Marketing Director of Wyższa Szkoła Biznesu – National Louis University in Nowy Sącz, I provide this recommendation for Mr. Wiktor Jeleń with full confidence, based on his strategic contribution to the execution of the "Researchers' Night 2022" event.

In this edition, Wiktor served as the Lead Engineer in the Network Infrastructure and Cybersecurity zone. His work provided hard evidence of proficiency in system architecture management, the implementation of rigorous security protocols, and data monitoring.

Key areas of his competence included:

- **Network Architecture and Cybersecurity:** Wiktor designed and deployed secure, fully isolated network environments for "Live" demonstrations. He showcased flawless implementation of "Security by Design" principles and access control mechanisms, effectively securing the demonstration infrastructure against unauthorized external interference.
- **Telemetry and System Integration (IoT/Cloud):** He successfully demonstrated the process of securely collecting and transmitting data from embedded systems to analytical dashboards. He proved his skills in optimizing information flow and configuring alerting systems in a distributed environment.
- **Social Engineering and Security Awareness:** Wiktor's unique added value was his ability to deconstruct complex digital attack vectors into language understandable to the general public. By conducting interactive demonstrations of controlled security breaches, he educated youth and adults in a highly accessible manner on fundamental digital hygiene and defense against social engineering.

Given the above, I recommend Mr. Wiktor Jeleń as a highly qualified specialist. His cold analytics, proactive approach to vulnerability identification, and ability to communicate complex architectural concepts make him an engineer ready to execute the most critical technological projects.

Should you have any questions regarding the technical aspects of the projects completed by Mr. Wiktor, I remain at your disposal at: marketing@wsb-nlu.edu.pl.
