

As the Marketing Director of Wyższa Szkoła Biznesu – National Louis University in Nowy Sącz, I provide this technical recommendation for Mr. Wiktor Jeleń with full confidence. My opinion is based on his key contribution to the technological execution of the "Researchers' Night 2024" event.

In this edition, Wiktor served as the Lead Software Engineer in the web technology and automation section. His work provided tangible evidence of proficiency in building modern, scalable solutions and professional code lifecycle management. Key areas of his competence include:

- **FastAPI Framework Development (Python):** Wiktor designed and implemented high-performance, asynchronous APIs. He demonstrated an excellent understanding of REST architecture, data validation (Pydantic), and automatic documentation (Swagger), confirming his high engineering standards.
- **Containerization and Orchestration (Docker):** He showcased proficiency in runtime environment isolation. He independently prepared container images (Dockerfiles), proving his skills in the DevOps domain and in ensuring environment consistency between development and production stages.
- **Professional Code Management (Git & GitHub):** Wiktor demonstrated proficiency in version control systems. He utilized the GitHub platform to publish and document his projects, applying industry best practices (commits, README, branch management). His approach to transparency and repository organization is evidence of professional maturity.
- **Knowledge Transfer and Communication:** A remarkable achievement of Wiktor's was his ability to explain complex concepts, such as "containerization" or "cloud-based code sharing," to non-technical individuals and children. He conducted workshops that visually demonstrated the fundamentals of modern programming.

Given the above, I recommend Mr. Wiktor Jeleń as a highly qualified specialist. His technical proactivity and ability to implement modern code standards make him a candidate ready to execute complex projects.

Should you have any questions regarding the technical aspects of the projects completed by Mr. Wiktor, I remain at your disposal at: marketing@wsb-nlu.edu.pl.
